WEDNESDAY, MARCH 24, 1880.

OWEN county, Ky., has instructed for Grant.

The Kentucky Legislature refused to allow Rev. H. W. Beecher the use of the Hall to speak in.

A negro man in Hawesville, has six fingers on one hand and seven on the other, and has seven toes on each foot.

ONLY 14 counties in the State are entitled to larger delegations in the Democratic State convention than Ohio. Seven others have the same number of delegates that Ohio county has.

There is no foundation for the rumor that Gen. Grant is drowned. It all grew out of surprise or imagination, and with the Blaine and Sherman men it was probably a case of "The wish is father to the thought."

There is a spring on the farm of J. R. Denning in Simpson county, Ky. This is nothing peculiar, as many farms have springs, and this spring was not peculiar, until recently, when it began to rise and water flowing from it has covered 100 acres of land. So says the *Franklin Local*.

John D. White, "the gentleman from Clay," was re-elected on the 12th to the Legislature. The three counties only cast 600 votes and John D. White managed to get the majority in those because of his having two or three opponents. This is a vindication of his conduct with a vengeance.

Wm. KENDRICK, an old citizen of Louisville, well known throughout the State, died on Tuesday of last week. He was the only man that we know of who paid his debts in full after being discharged from them in bankruptcy. He has been continuously engaged in the jewelry business for 38 years and was quite successful—due principally to his upright manner of transacting business.

DENTS KEARNEY, the leader of the communists at San Francisco, was arrested, tried and fined \$1,000 and sent to the House of Correction for six months. He took an appeal to the Supreme Court. The excitement has cooled down, and the Sand Lotters will be a little slow about taking the law into their own hands after seeing the determination on the part of all law-abiding people to see the law enforced.

In the Kentucky Senate adjourns without passing the House Bill reducing salaries, work our prediction they will never regret it but once, and that will be the balance of their natural lives. The masses of the voters will just as certainly hold it against them as the sun continues to shine. We warn you, Mr. Senators. The tax-payers demand this reduction *en masse*, and if you fail to pass the bill you will find when too late, that we were correct in our prediction.

GEN. JOHN M. PALMER, of Illinois, is spoken of by his friends, as a stupid man for President. The Democrats of Illinois are rather enthusiastic for him. A reader of the *HERALD* says he is for Hancock and Palmer, two brave Generals, who, when the objects of the war on the part of the Government, was accomplished, laid down their swords, and along with their weapons they laid aside all passions or prejudices engendered during the contest, and welcomed the seceding States back again into the brotherhood in the spirit of the Crittenden resolutions.

"Little Rhody."

The Republicans of Rhode Island, held their Convention the 18th Inst., and selected delegates to the Chicago Convention. The delegation are understood to be unanimous for Blaine.

Little Rhody for Tilden.

The Democratic convention of Rhode Island on Monday last, instructed for Tilden and Hendricks, and say they must be elected and inaugurated.

Pennsylvania's Tilden Boom.

PITTSBURGH, March 21.—FRANKFORT, Ky., March 20, 1880.
Editor Herald:

Since last writing the two Houses had been engaged in some important discussions, and have passed some important measures. The House has finally passed the bill providing for the branding of the Penitentiary after considerable discussion. The various bills to extend the old prison, work convicts on the chain gang, and to add new buildings, &c., were voted down, and the branch bill passed by a large majority. Only about 9 votes against it. The bill provides that the Governor shall, with the approval of the Senate, appoint a commission consisting of three discredited and disfavored citizens of Kentucky to be commissioners to select a site, and said commissioners shall, with the advice of the Governor, and give bond for the faithful discharge of their duties. They shall proceed to select a site and purchase lands for the erection of a branch penitentiary. They shall be governed in the selection of a suitable location for said prison, by the commissioners, either by railroad or navigable river, or both, by the healthfulness of the said site and community, and by the nearness, abundance, and cheapness of building material. They may buy not less than 200 nor more than 600 acres of land, and proceed to have erected a wall, fence, and other buildings, and to have them ready for occupancy by April 1st.

Graves county Republicans did not instruct, but instructed their delegates to vote for delegates for the State at large, who are outspoken Grant men.

Burke county was not *bored* of Grant Republicans on convention day, but enough of them were on hand to carry the county for the "Man on Horseback."

Scott county Republicans did not instruct.

Nicholas county Republicans did not instruct.

Oldham county Republicans failed to instruct.

The Republicans of Wolfe county failed to instruct.

Pike county Republicans want Grant but will take Blaine as second choice.

Beeone county Republicans failed to instruct.

Lewis county Republicans do not instruct.

Spencer county Republicans failed to instruct.

Pulaski county Republicans say Lord Grant is the third term.

Bullitt county Republicans increase the Grant boom.

Anderson county Republicans are for the European tourist for the next President.

Garrard county Republicans take Grant in "sheilin."

Jessamine county Rad's bellow loudly for Grant.

Bell county Republicans bellow for Grant.

Jackson county Republicans are for Plysos...

Owsley county Republicans will stick to Grant.

Pendleton county do not instruct.

Nelson county leaves her delegates uninstructed.

Brackin county Rad's don't want to swallow the third tier.

Montgomery county Republicans are for Grant.

Green and Owen county Republicans left their delegates uninstructed.

Webster county chimes for Grant.

The *Tribune's* predictions were correct.

Bowling county Republicans swelled the Grant boom on Saturday last.

The Republicans of Russell and Todd counties left their delegates uninstructed.

From the Messenger and Examiner.

A misnamed Phillips shot and killed a man named J. E. Snyder in Granville, Indiana, on last Wednesday.

Phillips claims that the deed was done in self-defense.

Newkirk was sentenced to the penitentiary for one year at Owensboro last week. An effort will be made to procure a pardon for him.

A little son of John Mahan was killed by a falling tree at his home near Pitzer Dayless county, recently.

PERSONAL.

Mr. H. Small returned home Sunday; Dr. Bruce, of South Carrollton, is attending court this week.

Mrs. Annie Hardwick is visiting her sister, Mrs. Lizzie Davis, at Pleasant Ridge.

Messrs. Wm. Hamilton and Wm. G. Daane, of McHenry, called on us last Saturday.

Uncle Warren Griffin and his grandson, little Wayne Joplin, left for home Saturday.

Mrs. W. C. Morton returned home Thursday from a visit to her parents in Brookline county.

Major Baker Boyd, of Owensboro, candidate for Commonwealth's Attorney, is in attendance at our Court.

Misses Sallie McDaniel and Anna Millikin spent last week with relatives and friends in the country.

Mr. Thos. L. Lewis, who has been absent from his home for four or five years, returned to his home at Rosine last week.

S. P. Roby, Esq., who has been at his father's, near Fordsville, for some time with measles, has recovered and is at his post again.

Mr. T. H. Geoghegan, of Elizabethtown, salesman for U. Merck & Co., of Louisville, was in town last week, and went to the House of Correction for six months. He took an appeal to the Supreme Court. The excitement has cooled down, and the Sand Lotters will be a little slow about taking the law into their own hands after seeing the determination on the part of all law-abiding people to see the law enforced.

Mr. W. H. Murrell, the lively druggist of Beaver Dam, and agent for the *HERALD*, was in town Monday, and had enrolled on our subscription book the names of several new subscribers.

Rev. E. D. Elliott, of the No Creek Circuit, M. E. Church, left last Sunday for Danville, to attend the session of the Kentucky Conference, which meets today. So far as we have learned, Elliott has given satisfaction.

Mr. Richard Bennett, brother of Wm. M. Bennett, of the McHenry neighborhood, has recently immigrated to this country, from Spencer county, Ind. He will probably locate on the G. J. Bean farm, in the Goshen neighborhood.

James Ezell, a boyhood acquaintance of ours, who has been living in Hoosier for twenty years past, called to see us last Saturday. He speaks of returning to this country soon. The fact is, this is a good country, and the most of those who leave it, sooner or later wish them selves back.

Mr. Thos. Graeme, adjusting agent for Barbee & Castleman, General agents for the Southern States of the Royal Insurance Company, of Liverpool, England, was here last week a short while engaged in adjusting the loss of W. T. Woodward. We found him to be a very pleasant gentleman and a good business man.

Educational.

W. L. Hawkins, Editor.

INTELLIGENCE pays—ignorance costs.

Choose between them.

QUALITY, not quantity, should be the test of success in teaching.

INTELLIGENT, well posted people sustain the teacher in his work of instruction and discipline.

Do you want to keep yourself interested? then keep them posted in what you are doing for them and they will be interested.

The good black board with a teacher who knows how to manipulate it does more good than all the scientific appliances for punishment.

WHEN the first Napoleon was asked at St. Helena how France might be regenerated, his answer was, "by educating the mothers of France."

In Wyoming the women vote. Every school house, we venture, has an ante-room with a hat rack, and is innocent of the fumes of whisky and tobacco.

Do you want to keep your pupils interested? keep them advancing, not so particularly from page to page of the text book as from vague idea to settled fact.

It matters not how much learning how much wisdom your teacher has, if he has not tact to get on pleasantly and smoothly with his scholars; he is, as a teacher, a failure.

If you have an idea that is useful, tell it. Remember if you tell it through your local paper, and tell it well, it may benefit thousands of others, without being one bit the less useful to yourself.

A YOUNG woman applying for the situation as teacher to a village school, being questioned by the trustees as to her qualifications, replied: "I am but an arithmeticker, but I am an elegant grammatical."

X. Y. Z.—Write just what you have to say in plain words, which are unmistakably English, and use as few of them as will clearly express what you want; then your style will be perspicuous and forcible.

ST. HELENA, Napoleon's "living tomb," was discovered by the Portuguese in 1801. Afterwards it came into the hands of the Dutch; and finally, in 1851, it fell into the hands of the English, who still have possession.

BEING good school houses, supply them with comfortable seats, furnish them with books of reference, plenty of black board surface, have them sensibly ventilated; then your children will, at all times be willing to attend school.

J. P.—Your letter does tolerably well, but you make too many common-place French and Latin quotations. Purity of style and common sense form my highest opinion of what it takes to make a good business-letter, or a newsy chatty letter of friendship.

In every department of education intellectual processes are quickened and invigorated by the manipulation of materials; by the practical doing; by the application of theory to practice; by the conversion of thoughts into acts.

STEVENS—Livermore—Among so many really excellent Educational periodicals, it is hard to answer your question definitely. The American Journal of Education, published at St. Louis, and the Eclectic Teacher, published at Louisville, are, in our opinion, among the best.

THE American Journal of Education for February is received. It is, as other numbers have been, chock full of readable and helpful articles just such as will make its readers wiser and better teachers.

Would that every teacher and parent in the land were taking and reading the American.

THE Commissioner's "Reports of visitations" are interesting and instructive, and well calculated to incite the people to improve their houses and schools. When will the people of Ohio county see that a moral liberal outlet for schools is the tree of economy? Well, some have seen it, and are rejoicing accordingly.

A TEACHER who has no mind about punishing a child for every little fault, who thinks he is keeping good order in proportion as he strikes terror to the hearts of his pupils—who feels glorified and exalted as he sees the little ones tremble and cower as he passes—will more nearly find his proper place and calling in a butcher's shop, or in the training of fighting dogs.

How true is it that the stream never flows higher than the fountain! This is preeminently true in education. If you want your children learned, you must send them to teachers who are learned. How can a man who has no "study of nights" to keep ahead of his classes, ever hope to make good scholars. Will your children learn morality from an immoral teacher—as well expect to gather figs from a thorn.

We have just finished the reading of the Eclectic Teacher for December. We would recommend the Eclectic to all who are interested in the matter of education, and who like to read and be posted in such things as pertain to teaching and education. Its value to a thoughtful teacher is simply incalculable, while it is almost as much value to every patron of a school. Its price puts it within the reach of all—only one dollar a year. Each number is really worth the money.

One great reason why children are frequently so averse to going to school, is to be found in the fact that the skill of the architect and builder is so taxed to render the school house as hateful and repellent to the children as possible. This is, we suppose, assuring the fond parent that their loved (?) ones are actuated by no other motive than the strong desire to become as learned as themselves. Then the bane! They are, in the majority of country school houses, the most ingenious contrivances of diabolical torture.

TO REMOVE BANDRELL.—Wash the hair thoroughly in rain water, with a good deal of borax dissolved in it.

It is useless to say that good comes from luck. It is not so. The secret is in selecting the seed with care, draining the fields, keeping out cattle, and having sound fences.

Young stock fattens much more readily than old stock. Pigs, when they have attained to their growth, fatten in a less cost than when older.

The same is true of steers and all other animals.

Don't be afraid of feeding your haying men during cold weather; more horses suffer from under feeding than over feeding. It takes a good deal of food to keep up animal heat, and provide the material for eggs.

A good Jersey cow, during ten years of usefulness, will produce skin oil enough to pay for her keep, and three thousand pounds of the best butter in the world into the bargain, butter worth several times as much as the heaviest beef animal.
